

2024 RISING STAR AWARD

NOAH HISER

RISING STAR AWARD

In 2018, Noah joined Phoenix Contractors as a Project Engineer. He began to work on projects as part of the Construction Management Team for the Ann Arbor Public Schools Projects. As the project developed and worked in 28 schools, Phoenix needed a system to track the work, subcontractors and Phoenix personnel. This tracking then had to be presentable to the schools recording all activities for all locations. He worked with Ranken Construction software and developed the full project tracking system successfully. He helped in the field where needed and in the office. As the hours were long, he kept finding ways to help efficiency and schedule work at several school locations.

In 2019, he began to meet with potential clients and found a niche helping potential owners get their smaller projects budgeted and scheduled. His hustle and effort led him to build clientele and grow a portion of the company. He has developed into a young leader in the industry and is a full-service high energy project manager with a positive outlook on everything.
